

Hand Gun Security Quick Access Pistol Safe

If you need quick access to a loaded firearm in your home, you must take special safety measures. Most fatal home firearms accidents occur when youngsters, often children who do not live in the home, discover firearms that the adults thought were safely hidden. Your most important responsibility is ensuring that children cannot encounter loaded firearms. Anything less invites tragedy.

In keeping a firearm for home security, your objective should be to create a situation in which the firearm is readily available to you, yet inaccessible to others. Responsible gun owners keep a loaded firearm securely locked away from young untrained hands
