

Hand Gun Security

Model # PB-48 Quick Access Pistol Safe

If you need quick access to a loaded firearm in your home, you must take special safety measures. Most fatal home firearms accidents occur when youngsters, often children who do not live in the home, discover firearms that the adults thought were safely hidden. Your most important responsibility is ensuring that children cannot encounter loaded firearms. Anything less invites tragedy.

In keeping a firearm for home security, your objective should be to create a situation in which the firearm is readily available to you, yet inaccessible to others.

Responsible gun ownership keeps a loaded firearm securely locked away from young untrained hands! Our model PB-48 "Pistol Packer" handgun box is constructed with 14 gauge steel – the heaviest in the industry! A custom brass locking bolt creates a strong pry-resistant handgun box without compromising your accessibility.

The bush button lock allows quick entry when the situation demands! The interior is cushioned with foam lining on both top and bottom to protect your gun from scratching. Bolt holes are provided for anchoring the safe in a fixed position. Perfect for the trunk of the car, closet, or nightstand.

The pistol packer is a necessity for any handgun owner wishing to prevent handgun accidents.
