

# COMPTRONIC™ 6120

## ELECTRONIC SAFE LOCK

### ADDED CONTROL AND FLEXIBILITY FOR GREATER SECURITY.

Sargent & Greenleaf safe locks have been protecting the assets of banks, businesses and governments for nearly a century and a half. Now, S&G is giving this proven protection a decidedly high-tech advantage with our Comptronic Electronic Safe Locks. Comptronic Safe Locks go beyond traditional locks to bring the benefits of current micro-processing technology to your new or existing safe:

- One-step operation -- just enter the code and the lock unlocks.
- Requires no turning of a dial to lock or unlock the lock.
- Puts an end to the dangerous practices of "day locking" or leaving the safe open.
- Automatically relocks when you shut the safe door.
- Lets you change codes at any time with a few touches of the keypad.
- Protects from being opened or manipulated with repeated, random code entry.
- Offers secure and reliable motor-driven lock bolt operation.
- Flexible interface capability works with security systems, time locks, alarm systems and CCTV.
- Allows for multiple users while at the same time giving you greater control over access.
- Programmable time delay of up to 9 minutes.

**Don't settle for less in protecting your safe when the Comptronic 6120 Safe Lock gives you the security and control you want.**
