

Worldwide Safe and Vault, Inc. UL Class 350 Insulated Vertical Files

Controlled, fire can be useful, benevolent, romantic. Uncontrolled, fire turns scary, destructive, devastating. Fire insurance can help recover some of the costs of a fire, but only if you can provide proof of what was lost and its value.

Business fires are particularly difficult. It takes time to collect the insurance, but meanwhile, the business also has to struggle with rebuilding records such as payroll, accounts receivable, and accounts payable. Insulated files should be used to protect those items that are key to any business and to substantiate the insurance claim.

Vertical Files

Phoenix insulated vertical files are designed to elegantly blend with any environment while providing superior fire protection for key records and documents. Available in two, three, or four drawer models, the files are capable of filing both legal and letter size documents. The files are tested by UL and carry the Class 350 – 1 hour fire resistant rating, making them perfect for storing paper records.

Model	Description	H x W x D	Weight
