

WORLDWIDE U.L RATED BURGLARY CLASS M, 1, 2, 3 PRESIDENTIAL VAULT DOORS

SECURITY

The Presidential Vault Door from Worldwide Safe and Vault provides the security consistent with Underwriters Laboratory test specifications, without compromising its attractive design. A team of 3 U.L. technicians failed to breach the security of the door within the specified test time. U.L. Class M provides the technicians with 45 man minutes, Class 1 with 90 man minutes, Class 2 with 180 man minutes, and Class 3 with 6 man hours. Passing the rigorous test, the Presidential Vault Door has proven superior to standard steel slab vault doors.

INSTALLATION

Worldwide or a local associate dealer will install your Presidential Vault Door anywhere in the world. All installation hardware, including jack bolt assembly, steel shims and two-inch safety treads, are provided.

SECURE CONSTRUCTION

Because of its' special construction, the Presidential Vault Door weighs considerably less than a steel slab door. It can be installed in locations where weight constrictions limit installation. Construction includes special grade steel and high strength concrete. The threshold is engineered with a flat sill for flush floor threshold entry.

CUSTOM DESIGN

The Presidential attractive design and massive appearance will compliment any decor. The satin smooth, fine-grained stainless steel finish covers every visible surface. A painted finish is available, or your choice of custom designed logos, scrollwork, "gold leaf" and special finishes are also available. The Presidential Vault Door is available with left or right swing.
